

## SF10 Ultra Small Multi-Purpose Tracker

Easily track and monitor packages, shipments, and mobile assets, in real time, with a compact tracking system.

### Compact Real-Time Tracking and Monitoring System

*Increased ROI, improved productivity and enhanced safety of employees and assets are just a few of many reasons companies are deploying fleet tracking and monitoring solutions. Still, some business owners have not deployed due to concerns of complexity or cost.*

### Tracker in One Compact Package

*Use the SF10 to track vehicles or shipments of electronics, produce, clothing, pharmaceuticals, medical supplies, or financial assets. If you need to know what's happening at a moment's notice, the SF10 is the powerful and convenient solution.*

### Eliminate the Loss of Goods

*Using Master Route exception reporting and monitoring allows managers to see the location, status and history of tracked assets. This is near real-time information that enables managers to identify the location and status of each asset.*

**This is a complete and highly reliable solution with a low cost of ownership that greatly decreases lost goods by providing:**

- Location
- Temperature
- Pressure
- Humidity
- Orientation
- Light

### Fixed and Mobile Asset Tracking

Easily track and monitor fixed or mobile assets in near real time with a compact tracking system.

### Keeps Your Assets Safe

Through timely information, the system allows you to take immediate corrective action to protect or recover assets in the event of loss, theft, or mishandling.

### Stay In Control

Be in the know at all times. Be alerted immediately to any security, handling, or environmental issues related to your assets. Be in the know at all times. Access near real-time information quickly and easily using any web browser, as well as receiving alerts through text and email.

### Modular Design

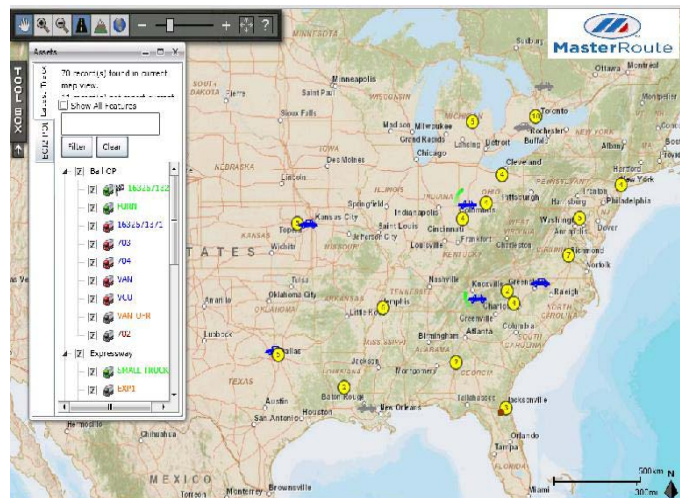

Separate plug-and-play command module and power/sensor pack options allow you to tailor your tracking solution to your application needs.

### Master Route Service

*Through the Master Route service philosophy, we provide expert consultation in addition to identifying the best device and network for your application. MasterRoute provides turn-key solutions for rapid deployment.*

### Eliminate Complexity

*SF10 trackers are simple to use and reuse. They're compact, portable, and contain everything you need in one integrated and easy-to-use package.*

## SF10 Ultra Small Multi-Purpose Tracker

Easily track and monitor packages, shipments, and mobile assets, in real time, with a compact tracking system.

### Hardware Product Features

- *CDMA (USA only) or Dual Mode (CDMA & GSM for worldwide coverage)*
- *Power: 3700 mAh Li-ion*
- **Battery Life:**
  - *Standby for 3 months*
  - *Turn on for 1 ping per day for 5 to 7 months.*
  - *Update hourly for three weeks.*
- **Form factor: 2.09" x 4.92" x 0.55"**
- **Weight: 4.2 oz.**

### Available Configurations

#### Basic Sensors

- *Rechargeable 3760 mAh lithium-ion battery*
- *Sensors for motion, shock, orientation, battery level and GPS jamming detection*

#### Advanced Sensors

- *Rechargeable 3760 mAh lithium-ion battery;*
- *Sensors for motion, shock, orientation, battery level, GPS jamming detection, temperature, relative humidity, barometric pressure, and light*

#### Optional Accessories and Battery Pack

- IP67 Enclosure
- Sensors for motion, shock, orientation, GPS jamming detection, temperature, relative humidity, barometric pressure, and light
- Power input connection for external battery or power
- One digital input, one regulated output

Optional Magnetic Mount enclosure

**Purchase with or without monthly service**
